REMARKS

The figures of births and deaths shown in this statement for week ending the 16th July, 1955 relate to 156 towns with an estimated population of 18,890 thousands. The total number of towns is 300 and their population is 38,988 thousands. Thus 52% of the total number of towns representing 48% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 12,660 and 5,215 representing birth and death rates of 34.9 and 14.4 per thousand of population respectively.

(a) *States (Parts A and C)*.—The data here relate to 116 towns with an estimated population of 13,786 thousands. Information about Ajmer, Bihar, Bombay, Madhya Pradesh and West Bengal could not be included. The total number of towns is 252 and their population is 32,572 thousands. Thus 46% of the total number of towns representing 42% of the total population is covered. The

number of births and deaths recorded in these towns were 9,872 and 4,179 representing birth rates and death rates of 37.2 and 15.8 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B)*.—The data here relate to 40 towns with an estimated population of 5,104 thousands. The total number of towns is 48 and their population is 6,416 thousands. Thus 83% of the total number of towns representing 80% of the total population is covered. The number of births and deaths recorded in these towns were 2,788 and 1,036 representing birth and death rates of 28.4 and 10.6 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
